Strategic School Enhancement Plan
Impact Review – Summer 2018

Leadership & Management

Strengthen the quality of leadership and management at all levels, including governance, to drive school improvement with measurable impact on pupil outcomes.

Links continue to be developed with other schools, both locally and more widely. We have particularly benefitted this term from working with our partner high schools to support our Year 5 and 6 learners in making choices about their next stage of education and aiding transition. Leaders have been assigned subject specific roles and are being supported to take over subject coordination in 2018-2019.

Teaching & Learning

Exceptional learning is the norm across all subject areas, learners experience depth within learning and are confident in applying their skills in a range of different contexts.

All staff have received training on developing opportunities for learners to deepen thinking and reason mathematically. Monitoring evidence shows that this training has impacted immediately within classroom practice and as a result overall school data for mathematics is 82.4% EXS+ and 55% GDS.

Personal Development, Behaviour and Safety

A wealth of opportunities are harnessed to support learners in developing resilience and positive attitudes towards mental health.

The impact of employing a counsellor in school has been significant, with over 18 learners accessing services in school immediately following referral for a period of 4 – 12 weeks. Parents report valuing this service and the speed of access. Fireworks wellbeing groups have been established and impact is awaiting.

Outcomes for Learners

Secure exceptional outcomes for all.

Assessment for all core subjects has been revised in line with school-agreed principles for assessment. A move towards this new system will take place in autumn 2018. Staff have been familiarised with the new systems which will enable accurate and robust assessment information and evidence to be collated for every learner and enable class teachers to proactively plan for next steps in learning on a daily basis.
